

Appendix

Appendix 1. Priority/severity activity diagrams for Medical, Police, and Fire

Priority Scheduling Ambulance Department System

Appendix 2. Critical and Non-Critical modules

Module	Critical / Non Critical
Record Log & Case Creation	Critical
Unit & Resource Management	Critical
Priority & Routing Units	Critical
Case Status Of Units	Critical
Department DashBoard	Non-Critical

Notification Service	Non-Critical
Search Logs	Non-Critical

Appendix 3. Roles and role permissions

Any feature that is not listed in the Interface Access, and Permission / Actionables columns corresponding to each user role is denied access.

User role	Interface Access	Permissions / Actionables
Dispatcher	- Access to Dashboard view of all active case (Case ID, location, Priority, required response, assigned unit, status) and check view recently created cases - Access to Record Emergency page - Access to the history log page	- Record details (From the caller) - Create emergency case - Search any logs from the history log page
Emergency Department (Police, Fire, Medical)	- Access to Dashboard (Display the assigned case related to that specific department) - View response unit details for that specific department in the Dashboard and Units page. - View notifications (In Dashboard)	- Update unit details such as location and unit count. - Unit availability is updated automatically by the system.
Unit (Police, Fire, Medical)	View the assignment interface showing the case assigned to that specific response unit and its incident details.	- Sign off after it completes its response. - Signing off releases that unit. - The case is automatically closed once all units assigned

		to that case has signed off
--	--	-----------------------------

Appendix 4. Core tasks for each user role

User Role	Core Tasks
Dispatcher	- Case creation flow (Receive call, then allowed to enter all required fields details specified from the caller, select the unit type, and create the case.) - Search case (In the history log interface, search log by call name, case ID or Record date, to view cases.)
Emergency Department (Police, Fire, Medical)	- Unit Management (In the Units interface, view all response units belonging to that department and update editable details such as location and personnel count.) - Monitor Dashboard (In the Dashboard interface, view cases requiring that department, response unit availability, assigned units, waiting cases, and assignment notifications.)
Unit (Police, Fire, Medical)	- Sign-off (in the assignment interface, when the response unit has completed its response, it can sign off from the case) - View case (view the incident details and assignment details for the case currently assigned to that specific response unit)
